***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to an apparatus for automated negotiation, classified in class 705, subclass 37.
  - II. Claims 10-26, drawn to a method for automated negotiation, classified in class 705, subclass 37.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I relates to an apparatus for automated negotiation including a server, a database and client devices controlled by the negotiating parties, whereas invention II relates to a method for automated negotiation including the steps of setting the parameters of the negotiation and making an offer in response to an invitation. See MPEP § 806.05(d). Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
3. A telephone call was made to Mr. Steven A. Swernofsky on April 17, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
4. Applicant is advised that reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
